

BIZCOURIER WEB SERVICES

Dear Partners,

We would like to inform you that BizCourier can now offer you the ability to retrieve the information given by your company for modifying a shipment directly from your company's software or website by taking advantage of BizCourier Shipment Update Information Web Service.

Requirements	
Method	Description
getupinf	Retrieves the info given for a specific shipment modification.

Input Fields

Input Fields	Description
Code	*Client's code used to create the shipment
CRM	*Client's CRM code used to create the shipment
User	*The Username used to create the shipment
Pass	*The Password used to create the shipment
Voucher	Shipment's tracking number for which you want to retrieve the info.
Smodun_ref	The Unique Code for a shipment modification, provided to you at the time you added the modification.

Output Fields

Output Fields	Description
Error_Code	Returns "0" if authentication data and Shipment's data are correct
Error	Description of the error
Shipment_Number	The shipment number provided
Mod_Unique_Code	The modification unique code
Mod_Instructions	The modification instructions

Details – Clarifications

* If you do not know any of the authentication data will be happy to provide this on request via email at info@bizcourier.eu with Cc to support@bizcourier.com.gr

** Field Error returns as a result the basic errors description.

WSDL

The WSDL file can either be downloaded from the link:

https://www.bizcourier.eu/pegasus_cloud_app/service_01/smodinst.php?wsdl

or emailed to you on request at support@bizcourier.com.gr

You may start testing it with SoapUI Software by clicking on the link below:

<http://www.soapui.org/>

If you require any further information or clarification please email your queries to support@bizcourier.com.gr and we shall be more than happy to assist you.
