

BIZCOURIER WEB SERVICES

Dear Partners,

We would like to inform you that BizCourier can now offer you the ability to create a booking so that you can supply our warehouse with stock directly from your company's software or website by taking advantage of Product Creation Web Service.

In order to achieve this, you have to use a combination of 3 services. Service 1: provides a list of all the available warehouses.

Service 2: provides a list of all your products.

Service 3: offers a base-64 string which is the Packing list in pdf format which you can print and attach to the pallet with the stock you wish to send.

Service #1

Biz Warehouses

| Requirements | |
